

CITY OF ALLENTOWN SNOW EMERGENCY PLAN

**SUBMITTED BY:
PUBLIC WORKS DEPARTMENT**

Established: 1979

Revised: November 2025

Additions or corrections contact Gabrielle.Heiney@allentownpa.gov

WE NEED YOUR HELP!

STATEMENT

The purpose of the City of Allentown's Emergency Operations Plan is to establish a comprehensive emergency management program that ensures a coordinated, efficient, and effective response to emergencies. The plan aims to preserve life, minimize property damage, provide critical assistance during emergencies, and support recovery efforts to restore the community to normal conditions.

PLAN

This plan, along with all references, appendices, and annexes, defines the roles, responsibilities, locations, and procedures necessary to mitigate, prepare for, respond to, and recover from the effects of natural and technological disasters.

This plan will work if each director and each bureau head require every employee under their jurisdiction to be assigned to the snow emergency workforce to:

- BE AWARE OF THE SHIFT IN CHAIN OF COMMAND DURING AN EMERGENCY
- BECOME FAMILIAR WITH THEIR ASSIGNED DUTIES
- COOPERATE FULLY

We're counting on YOU

DECLARATION OF EMERGENCY - PERSONNEL

1. Weather Reporting Service
Senior Meteorologist
AccuWeather
385 Science Park Road
State College, PA 16803

WeatherWorks

2. Weather reports are emailed by the Weather Service to the City Snow Control Center 24 hours per day. The report is then emailed to the following City offices.

- A. Director of Public Works
- B. Mayor's Office
- C. Emergency Management Coordinator
- D. Bureau of Parks
- E. City Garage

Weather reports are emailed to various PW staff by the weather service during Saturdays, Sundays and holidays. These reports are immediately relayed to the Director of Public Works and the City's Emergency Management Coordinator.

3. The Director of Public Works, in conjunction with the Streets Superintendent, Police Chief and the City's Emergency Management Coordinator, determines that a state of snow emergency or emergency exists and reports it to the Mayor.

4. CLASSIFICATION OF SNOW EMERGENCIES

- 1" to 6" - Minor Snow Events - storms of this magnitude handled by Public Works and Parks crews (regular plowing). A Snow Emergency would not be declared.
- 6" to 12" - CLASS 3 - Snow Emergency Plan is activated using two 12-hour shifts. A snow emergency may be declared. -Snow Emergency Routes, if cleared of cars, do not need snow removal efforts - most secondary streets can be plowed open - snow removal efforts are generally confined to two snow blower crews plus two loader crews using priority lists on Pages AA-83 and AA-84 - minimum equipment rentals would include 1 loader for pushing, 2 loaders for loading plus approximately up to 10 trucks - removal efforts around schools will be minimal.
- 12" to 18" - CLASS 2 - Snow Emergency Plan is activated using two 12-hour shifts -some Snow Emergency Routes may need removal (especially Tilghman Street and 15th Street) - some narrow streets may require removal efforts with small crews - additional rental trucks (up to 25) may be required - small rental crews may be needed - removal efforts around schools will be stepped up (schools will probably be closed at

least two days) - additional salt may be required

-- over 18" - CLASS 1 - Snow Emergency Plan may be activated prior to the storm - most Snow Emergency Routes will require removal - secondary and narrow streets will require 6-8 small removal crews - help from National Guard may be essential in this area - all-out effort will require minimum rental of 4-6 small crews, two large loaders for pushing, four medium loaders for loading, 30-40 trucks for hauling - removal efforts around schools will be maximum; however, will be delayed several days because school will probably be closed for 3-5 days - additional salt will be required - emergency funding will be essential - Purchasing Agent to be transported to Snow Control Center - National Guard might be contacted.

5. After an emergency has been declared, as per Ordinance, Article #527, the Director of Public Works shall notify the Manpower Coordinators who in turn will contact the people indicated on pages AA-9 through AA-10 of the Snow Emergency Plan.

MANPOWER COORDINATORS

Mark Shahda
Dale Tretter - *alternate*

The snow emergency shall be declared between the hours of 7:00 AM to 11:00 PM and shall go into effect **FOUR HOURS AFTER THE DECLARATION**.

6. Call-In Procedure - Telephone calls announcing the emergency will progress in accordance with Snow Emergency Plan Alert Procedure diagram (See Page AA-8).
7. The Manpower Coordinator shall be responsible to contact all Bureau Managers and alert them of the emergency declaration and request their cooperation in call-in of their respective personnel listed on the "Personnel Reassignment Roster".
8. The Bureau Managers shall immediately proceed to implement their respective Bureau's snow emergency responsibilities as outlined in the Snow Emergency Plan and coordinate their efforts as required with the overall plan (See pages AA-49).
9. Outside agencies to be notified are as follows:

Allentown Parking Authority- 603 W. Linden Street
Oswaldo Tosado

SNOW EMERGENCY CENTER PERSONNEL & OVERVIEW

Bureau of Streets Building
1825 Grammes Road

The Snow Emergency Center will be placed in operation by the Bureau of Streets prior to the declaration of an emergency and will be operated by their personnel on a limited basis until the emergency operations are established. All snow-related operations during the emergency shall be directed through the Emergency Center.

When an emergency is declared, personnel will be assigned to the Snow Center using two methods of operation. The two methods and assignments are as follows:

METHOD I -- TWO 12-HOUR SHIFTS - WORK SCHEDULE:

EQUIPMENT COORDINATORS.....

MANPOWER COORDINATORS

RENTAL EQUIPMENT MONITORS.....

SHUTTLE DRIVER FOR PERSONNEL.....

FLAG PERSONS/REMOVAL.....

POSTING

EOC OPERATORS.....

PUBLICITY.....

RISK & SAFETY MANAGER

POLICE OFFICERS.....

PURCHASING AGENT

The Snow Emergency Center is equipped with telephones, radios and other equipment necessary for providing control of the total Snow Emergency Operation. The public will have direct contact with the Center by dialing the number 610-437-SNOW (610-437-7669) and will be intercepted by a telephone operator, responsible for the telephone lines.

All communications shall be documented on a complaint card (See Page AA-55) which indicates the complaint, date, name, address and telephone number of the complainant. These cards will be catalogued and dispersed by the Shift Supervisor.

The Center is equipped with three remote radios, one for each of Streets, Parks and Inspections frequency. The radios are located so the operators have direct contact with the telephone operators.

An intercommunications system between the radio room and the conference room is operational along with a public address system covering the entire Snow Emergency Center.

The Bureau of Police shall assign an officer with a portable radio to the Center to provide immediate communication with police personnel in the field.

BUREAU RESPONSIBILITY DESCRIPTIONS

BUREAU OF ENGINEERING

BUREAU MANAGER – JOSEPH MILLICK

ALTERNATE – DAVID PETRIK

Upon receiving notice that a snow emergency has been declared, the Bureau of Engineering shall provide the necessary backup engineering and management services for the Department of Public Works as required during the snow emergency and coordinate its efforts in accordance with the requirements of the Snow Emergency Plan.

The Bureau of Engineering will provide the necessary personnel to assist during the snow emergency by providing various services as defined in the Snow Emergency Plan and shall make available, for transportation of personnel, one (1) van and three (3) automobiles.

The Bureau of Engineering shall restrict its normal functions to provide coordination with the snow emergency functions.

BUREAU OF TRAFFIC

TRAFFIC CONTROL SUPERINTENDENT – YEIMY DELGADO

SUPERVISOR – WILLIAM DeLONG

Upon receiving notice that a snow emergency has been declared, the Bureau of Traffic shall coordinate its efforts in accordance with the Snow Emergency Plan.

The Bureau of Traffic shall provide whatever manpower is available for the snow emergency effort. They will also provide two (2) vehicles for use as transportation by the Department of Public Works and (1) truck for use as transportation for the sign posting that will be needed.

The Bureau of Traffic shall provide the necessary "NO PARKING" signs and other traffic control devices as required.

The Bureau of Traffic shall restrict its normal functions to provide coordination with the snow emergency functions.

BUREAU OF STREETS

SIGN POSTING/REMOVAL

SUPERVISOR – JASON HERTZ

ALTERNATE – WILLIAM KUNTZMAN

Immediately upon notification of the declaration of a snow emergency by their respective Bureau Manager, the posting personnel shall proceed to the Bureau of Streets at 1825 Grammes Rd. and report to the supervisor for assignments and instructions.

The sign posting personnel duties are as follows:

1. Post "NO PARKING" signs and/or other traffic control devices as required for the removal of the snow.
2. Remove "NO PARKING" signs on the street where snow has already been removed.
3. On occasion, provide assistance to the snow removal crews by serving as a flagman to provide traffic control in order to protect the operations as well as the motoring public.

SIGN POSTING PERSONNEL

TBD

TBD

TBD

TBD

TBD

Allentown Parking Authority (If Needed)

Surveyors' van, or other city vehicles, shall be used for the posting crews.

BUREAU OF STREETS

SUPERINTENDENT – DALE TRETTER

ALTERNATE – MIGUEL BONILLA
ALTERNATE – MATTHEW HOFFMAN

Upon receiving notice that a snow emergency has been declared, the Bureau of Streets shall establish operation of the Snow Emergency Center and shall organize its equipment and manpower in accordance with the Snow Emergency Plan.

The Bureau of Streets shall be responsible for snow removal operations except for those assigned to other departments and bureaus.

The Bureau of Streets shall restrict its normal functions to provide coordination with the snow emergency functions.

BUREAU OF PARKS MAINTENANCE

DIRECTOR – MANDY TOLINO

PARKS SUPERINTENDENT – CHRISTIAN BIANCO

ALTERNATE – MICHELLE MCGINNISS

Upon receiving notice that a snow emergency has been declared, the Bureau of Parks shall coordinate with the Bureau of Streets and provide equipment and manpower as needed and available.

The Bureau shall restrict its normal functions to provide coordination with the snow emergency function.

Upon receiving notice of a snow event or a snow emergency has been declared, the Bureau of Parks shall organize its manpower and equipment in accordance with the snow emergency plan for snow removal operations for those areas of the Bureau's responsibilities.

The Bureau of Parks shall immediately proceed to remove snow from along sidewalks of the following City properties and bridges as per the Bureau's snow control plan:

17. #9019 39,000 GVW Plow and Spreader
18. #9259 F-550 Plow and Spreader
19. #9260 F-550 Plow and Spreader
20. #9014 F-550 Plow and Spreader
21. #9015 F-550 Plow and Spreader

BUREAU OF BUILDING MAINTENANCE

BUREAU MANAGER – NICK GRUBER

OFFICE MANAGER – JOVAN SABA

Upon receiving notice that a snow emergency has been declared, the Bureau of Building Maintenance shall organize its manpower and equipment in accordance with the snow emergency plan for snow plowing and removal operations for those areas of the Bureau's responsibility.

The Bureau of Building Maintenance shall immediately proceed to remove the snow from the following areas:

1. City Hall Complex (sidewalk plus streets)
2. Bridgeworks Complex (sidewalk plus parking lot)
3. 10th Street police station (sidewalks & parking deck)
4. Assist in plowing alleys in District #1 (East Allentown)
5. Assist in plowing at Overlook Park (East Allentown)
6. Fire Academy (sidewalks)

The pieces of equipment to be used for plowing are:

- *1. #Ventrac: 4500 with snow blower & brush (To be used on 10th Street APD parking deck)
- *2. #7B004: F350 4X4 with V Plow
- *3. #7B001: F250 4 x 4 Pickup w/V Plow
- *4. #7B003: F550 Stake Body 4x4 w/Plow
- *5. #7223: GMC3500 4x4 w/V Plow
- *6. #7B002: F250 4 x 4 Pickup w/V Plow
- *7. #7B005: F350 4 x 4 Pickup w/ V Plow

NOTE: *Trucks must be operated by Bureau personnel in case of emergency.

RECYCLING AND SOLID WASTE

BUREAU MANAGER – BRETT STOUT

ALTERNATE – ERIC TROBETSKY

Upon receiving notice that a snow emergency has been declared, the Bureau of Recycling and Solid Waste shall coordinate its efforts in accordance with the Snow Emergency Plan. The Bureau of Recycling and Solid Waste shall restrict its normal functions to provide coordination with the snow emergency functions.

The Bureau of Recycling and Solid Waste shall provide whatever manpower and vehicles are available for the snow emergency operations as listed below.

The Bureau Manager shall instruct any personnel who cannot get to the Snow Center on their own to call the Streets Department (610-437-7638) for transportation. All calls shall be made two hours prior to their scheduled shifts.

The Bureau is responsible for plowing as assigned. The four pickups with plows and operators will be supplied:

1. #7301 Pickup truck w/plow & Spreader
2. #7302 Pickup truck w/plow & Spreader
3. #7323 Pickup truck w/plow & Spreader
4. #7R004 Pickup truck w/plow & Spreader

The Bureau of Recycling and Solid Waste has the following personnel available to the Streets Bureau as needed:

- (8) Class A CDL drivers
- (1) Class B CDL drivers

As listed above, four additional personnel will be assigned to sign posting and one Clerk shall be assigned to Snow Control Phones.

All personnel will be assigned in order of seniority.

The Bureau Manager, Director and Deputy Director of Public Works shall determine any changes to the citywide trash and recycling collection schedule performed by the city's contractor. Appropriate notification to the public shall be coordinated with the Communications Manager for dissemination.

BUREAU OF MUNICIPAL GARAGE

BUREAU CONTACT – JULIO VARGAS

ALTERNATE – SHELBY CAMERON

ALTERNATE – CHAD HANSON

Upon receiving notice that a snow emergency has been declared, the Municipal Garage shall organize its manpower and equipment to provide maintenance and service to City vehicles and equipment necessary for operations during the snow emergency and in accordance with the Snow Emergency Plan.

The Municipal Garage shall coordinate its efforts closely with the Bureau of Streets to assure that all equipment is properly equipped with chains, snowplows, salt and cinder spreaders, etc., and to provide backup service in the event of equipment breakdown.

The Municipal Garage shall restrict its normal functions to provide coordination with the snow emergency functions.

DEPARTMENT OF POLICE

DEPARTMENT HEAD – CHARLES ROCA

ALTERNATE WILL BE ASSIGNED AT TIME OF EMERGENCY

Upon receiving notice that a snow emergency has been declared, the Department of Police shall organize its manpower and equipment in accordance with the Snow Emergency Plan.

The Police Department shall immediately take whatever steps are necessary to enforce Ordinances Articles #527 and #711 relative to parking of vehicles on designated snow routes during a snow emergency and coordinate these activities with the Department of Public Works in the implementation of the snow removal operations.

The Police Department, ten hours after the storm has ended, shall take whatever steps necessary to enforce Ordinance Article #527 for snow being placed in the street and travel lanes.

The Police Department shall also coordinate the Bureau of Traffic in the posting of "No Parking" signs and/or other traffic control devices as required for the snow emergency.

The Police Department shall assign a police officer with a portable radio to the Snow Emergency Center to transmit vital information to other police officers in the field.

The Police Department shall cooperate and coordinate its efforts with other departments and bureaus of the City relative to the snow emergency operations and continue to maintain its normal function.

DEPARTMENT OF FIRE

DEPARTMENT HEAD - FIRE CHIEF EFRAIN AGOSTO

ALTERNATE - DEPUTY FIRE CHIEF CHRISTIAN WILLIAMS

Upon receiving notice that a snow emergency has been declared by the Mayor's office, the Fire Department will immediately initiate the following actions:

1. Install tire chains on all fire vehicles.
2. Install snow plows on three (3) pickup trucks.
3. Additional fire hose (1000 linear feet) shall be placed on the pickup trucks for fire service backup.
4. Pickup trucks shall be dispatched to clear snow from all fire station ramps.
5. Contingent of fire service personnel shall be dispatched to remove snow (shovel) from fire hydrant locations for access.
6. The Fire Department shall provide additional manpower (off duty firemen) as required.

The Fire Department shall maintain its normal function and coordinate with the snow emergency operations as may be necessary.

ALLENTOWN EMERGENCY MANAGEMENT COORDINATOR

EMERGENCY MANAGEMENT COORDINATOR – MATT EHARTH

Upon receiving notice that a snow emergency has been declared by the Mayor's Office, the Emergency Management Coordinator shall make an announcement over all City radio channels that a snow emergency has been declared and also notify the Lehigh County Communications Center via the Hotline that a state of snow emergency exists.

The Emergency Management Coordinator shall maintain their normal function and coordinate with the snow emergency operations as may be necessary.

Once a snow emergency is declared, a CodeRed message will be put out to the Allentown community via that media platform.

PUBLIC RELATIONS

COMMUNICATIONS MANAGER – GENESIS ORTEGA

Upon receiving notice that a snow emergency has been declared, the Public Information Officer shall give notice and advise the general public via radio, television and newspapers of the emergency procedures being taken by the city and inform them of their responsibilities and request their cooperation.

The Public Information Officer shall coordinate their efforts with the Snow Emergency Plan and maintain a close working relationship with the Manpower Coordinator and the activities of the Snow Control Center.

The public should be informed of the following:

1. The declaration of an emergency.
2. Explanation of no parking requirements on designated routes and requirements as spelled out in Ordinance Article XI in addition to special requirements.
3. Request citizen participation in clearing snow from storm sewer drains and fire hydrants.
4. Snow clearance from sidewalks as per Ordinance Article XI.
5. Request to avoid shoveling snow onto streets.
6. Information relative to developments during the snow emergency of the snow emergency operations.
7. Any changes to the trash and recycling collection schedule as approved by city officials.

JOB DESCRIPTION

MANPOWER COORDINATOR

Immediately upon the declaration of the emergency by the Mayor, and a direct order from the Director of Public Works, the Manpower Coordinators shall initiate the organization of the Snow Emergency Plan by calling all Bureau Managers or alternates of their respective bureaus, directing them to proceed to initiate their bureau's effort outlined in the Snow Emergency Plan and communicate any special instructions which would assist to expedite the emergency effort.

The Manpower Coordinators directly report to the Director of Public Works and shall have total responsibility for the coordination of all personnel and operations during all Snow events and Snow Emergencies and shall assure that operating procedures are in accord with the Snow Emergency Plan.

It is the responsibility of the Manpower Coordinators to keep the time records for the personnel working snow control.

MANPOWER COORDINATORS

1. Mark Shahda
2. Dale Tretter

JOB DESCRIPTION

RENTAL EQUIPMENT COORDINATOR

Immediately upon notification of the declaration of a Snow Emergency by their respective Bureau Managers, the Rental Equipment Coordinator shall report to the Snow Emergency Center. He will be responsible for coordinating the hiring and scheduling of the various types of equipment needed to assist the City forces in combating the snow storm.

The coordinator will be responsible for the following:

1. Contact the contractors listed on the Equipment Rental Roster in order to obtain the pieces of equipment required.
2. Arrange for the equipment and operators to report at a designated location so they can be assigned their work schedule and to sign in and out at the beginning and end of each shift.
3. On a day-to-day basis, for the duration of the emergency, maintain all records, time sheets, etc. in order to compute the cost for each piece of equipment used per shift.
4. Handle any and all problems related to breakdowns and reassigning equipment during a particular shift.

EQUIPMENT RENTAL COORDINATOR

1. Kyle Sergeant
2. Adam Fisher

JOB DESCRIPTION

RENTAL EQUIPMENT MONITORS

Immediately upon notification of the declaration of a Snow Emergency by their respective Bureau Managers, the Rental Equipment Monitor shall report to the Snow Emergency Center. He will be responsible for coordinating the various work assignments needed to assist the City in combating the snow storm.

The monitor will be responsible for the following:

1. The Rental Equipment Monitor is to report to the main staging area designated location at the beginning of his or her shift and sign in the equipment which has been assigned for that shift. The monitor shall fill out the log sheet indicating name of contractor/type of equipment (i.e., single axle, 10-wheeler, tri-axle or loader with size bucket). It is important that the monitor identify the unit by either a unit number, license number or some other means of identification. This is needed in order to track the equipment throughout the duration of the operation.
2. On a shift-to-shift basis, for the duration of the emergency, maintain all records, time sheets, etc. in order to compute the cost for each piece of equipment used per shift.
3. Handle any and all problems related to breakdowns and reassigning of equipment during a particular shift.
4. Monitors that help with Flagging during any Snow Emergency operation are required to wear an approved safety vest. Failure to comply will result in disciplinary action.

JOB DESCRIPTION

DISTRICT SUPERVISOR

Immediately upon notification of the declaration of an emergency by the Shift Superintendent, the District Supervisor shall initiate the organization of snow fighting equipment and personnel assigned to their respective district and coordinate the snow removal operations as directed by the Shift Superintendent in accordance with the Snow Emergency Plan.

The District Supervisor shall be responsible to assign the snow fighting equipment and personnel to specific areas within their district and monitor the work accomplished in the field to assure that streets are being plowed open to the prescribed width and that the plowing operations are proceeding as shown on the district maps so that no streets are missed.

The District Supervisor shall follow up on all complaints received by checking them out and taking whatever appropriate action is necessary to resolve them.

The District Supervisor shall report immediately, to the Shift Superintendent, any problems which develop with the equipment and manpower and take the necessary steps to remedy the problem as deemed necessary or as directed by the Shift Superintendent.

The District Supervisor shall assure that the Snow Emergency Center is constantly updated as to the status of the operations in their district and keep appropriate records so that actions can be backed up should problems arise at a later date.

The District Supervisor, at the end of the shift, shall report to the on-coming supervisor as to work completed, status of equipment and whatever other information may be helpful toward continuing smooth operations.

DISTRICT SUPERVISOR

They will be assigned by the Superintendent of streets at time of emergency.

JOB DESCRIPTION

EMERGENCY OPERATIONS CENTER OPERATORS

Immediately upon notification of the declaration of a snow emergency by their respective Bureau Manager, the EOC Operators shall proceed to the Snow Emergency Center and report to the Shift Supervisor for assignment and instructions.

The EOC Operators shall be directly responsible to the Public Works Administrative Manager. Duties shall consist of receiving and dispatching messages and documenting necessary information on a complaint record card (see Page AA-55) and inputting necessary information into the Lucity Work Order system. He/she shall maintain direct contact and coordination with the Telephone Operators and assist in the expedition of complaints and perform related duties as directed by the Shift Supervisor.

Director of Admin. & Finance..... Bina Patel

..... Jessica Baraket

Chief of Police Charles Roca

Asst Chief..... James Gress

Chief of Fire Protection..... Efrain Agosto

Deputy Fire Chief Christian Williams

Public Relations..... Genesis Ortega

The Department Director shall notify their respective Bureau Managers that the emergency has been terminated and direct that they cooperate with the Manpower Coordinator during the phase out of the emergency operations.

The Director of Public Works shall immediately inform the following persons upon termination of the emergency and direct that the emergency operation be phased out in an orderly and coordinated manner:

Director of Public Works Mark Shahda

Deputy Director Public Works David Petrik

Street Superintendent..... Dale Tretter

Chief Maintenance Supervisor..... Miguel Bonilla

Chief Maintenance Supervisor..... Matthew Hoffman

Traffic Engineer Yeimy Delgado

2. The Manpower Coordinator shall contact all Bureau Managers and inform them of the termination of the emergency and request their cooperation in the phase out of the operations.
3. The Bureau Managers shall initiate normal bureau operation in a coordinated manner with the Manpower Coordinator.

WEATHER CRITERIA

- Mixed Precipitation

STARTS: 01/31/2021 1:00 PM EST

EXPIRES: 02/02/2021 7:00 AM EST

VALID LOCATIONS

- Allentown

COMMENTS

A long lasting and complex storm will cause snow to spread across the area early Sunday afternoon then snow will continue at varying rates Sunday afternoon and Sunday night into Monday, perhaps mixing with sleet at times. Any mixed precipitation will change back to all snow Monday night before tapering to flurries Tuesday morning.

*NOTE: A brief period of light snow is possible Sunday morning with little to no accumulation.

Precipitation Type:

Periods of Snow. Snow may mix with Sleet.

Total Snow Accumulation:

8-14 inches.

Total Ice Accumulation:

Trace inches.

Snow Probability Potential:

100% chance of 6" or more. 70% chance of 8" or more. 40% chance of 12" or more.
15% chance of 18" or more.

Snow Type: Dry.

Drifting:

Moderate.

Untreated Road Conditions:

Main roads: Snow Covered. Secondary roads: Snow Covered.

Weather Following Storm:

Flurries - Little or No Accumulation. Days above 32/Nights Below 32.

Temperatures:

High today 32. Low Tonight 14. High Sunday 30. Low Sunday night 25. High Monday 29. Low Monday night 26. High Tuesday 34.

Wind:

Northeast increasing to 15-25 mph Sunday night with gusts of 35 mph possible Monday into Monday night.

WEATHER ALERT

Snow Continues... Steady snow will continue through the remainder of the day and into this evening, reaching moderate intensity. Additionally, winds will remain strong through tonight which will keep visibility low and lead to blowing snow. There is a low risk for eastern and central portions of the Lehigh Valley to briefly mix with sleet or freezing again to begin though the majority of precip will remain snow. The majority of the remaining snow will fall from now through before we see snow taper off to a lighter intensity during the overnight. Snow will then turn less organized intensity but lingers through the day. Accumulations with periodic light snow are expected through Tuesday (favoring the morning) will remain lighter than today and tonight. Drier conditions look to finally work in for Wednesday morning.

OVERVIEW				
Start Time	End Time	Total	Snow Confidence	
Ongoing	Tuesday 1:00 PM - 4:00 PM	16.0 - 22.0" Snow	12.0 - 16.0"	100%
Heaviest snow falls through this evening	Flurries / snow showers linger later	total snow Sun-Tues	16.0 - 22.0"	55%
			22.0 - 30.0"	35%
MOVEMENT DETAILS	Accumulation	8.0" - 12.0" Snow	First Inch	N/A
	Comments	Additional; blowing and drifting can lead to some variability in depth		

HAZARDS		
Hazard	Threat	Description
Ice	Low	Typical melt / refreeze cycles post storm.
Snowfall Rate	High	1-2"+/hr rates occurring. Rates taper tonight with lighter snow into Tuesday morning.
Blowing Snow	High	Gusty winds will result in blowing and drifting particularly this afternoon / evening.

FORECAST	
Monday	Aside from maybe a few sleet pellets, heavy snow will continue for much of the day. 4.0 - 8.0" of Snow (Additional) High 28 - 32 NE wind 10 - 25 mph, gusts 30 - 35 mph

ARTICLE XI
Snow Routes; Snow Removal

§ 615-33. Definitions. [Amended 1-7-1970 by Ord. No. 11784]

The following words, when used in this article shall, unless the context clearly indicates otherwise, mean or include as follows:

CITY — The City of Allentown.

PERSON — Any natural person, firm, copartnership, association or corporation.

STREET — Every way or place of whatever nature, within the City, open to the use of the public as a matter of right, for purpose of vehicular travel.

VEHICLE — Any device in, upon or by which any person or property is or may be transported or drawn upon a public street.

§ 615-34. Declaration of snow emergency. [Amended 12-1-1970 by Ord. No. 11838; 10-6-1994 by Ord. No. 13283]

- A. In the event weather conditions make it necessary for motor vehicle traffic to be expedited and parking on City streets be prohibited or restricted for snow plowing and other purposes, the Mayor or the Mayor's designated representative shall declare a snow emergency. The declaration of a snow emergency may be made on any of the seven days of the week at anytime between the hours of 7:00 a.m. and 11:00 p.m. Such declaration shall not go into effect until four hours after it has been announced. Once in effect, a prohibition under this section shall remain in effect until terminated by announcement of the Mayor or the Mayor's representative, except that any street area which has become clear of snow and ice from curb to median line for the length of the entire block shall be automatically excluded therefrom. While the prohibition is in effect, no person shall park or allow to remain parked any vehicle on any portion of a snow emergency route.
- B. However, nothing in this section shall be construed to permit parking at any time or place where it is forbidden by any other provision of law.

§ 615-35. Snow emergency routes. [Amended 3-20-1997 by Ord. No. 13557; 12-26-2011 by Ord. No. 14961]

Upon declaration of an emergency and for the duration thereof, parking shall be prohibited on the following streets, except as provided for in § 615-34:

Street	From	To
7th	Union	City line
12th	Green	Tilghman
12th	Hamilton	Walnut
15th	Elm	Mauch Chunk Road
17th	Hamilton	City line

Street	From	To
24th	Hamilton	East Texas Boulevard
Chew	4th	City line
East Hamilton	Carlisle	Aubrey
Emaus Ave	Bradford	Mack Boulevard
Front	North City line	Gordon
Gordon	American Parkway	Front
Hamilton	Front	4th
Hamilton	12th	20th
Hanover Avenue	East Hamilton	City line
Irving	Hanover Avenue	Union Boulevard
Lehigh	Auburn	South 12th
Liberty	17th	19th
North 19th	Liberty	Roth Avenue
North 4th	Gordon	Chew
Oxford Drive	Lehigh	Salisbury Drive
South 10th	Martin Luther King, Jr., Dr.	Wyoming
South 4th	Hamilton	Walnut
South 4th	Priscilla	Susquehanna
South 8th	Walnut	Union
South 8th	Harrison	Susquehanna
St. John	South 8th	Lehigh
Susquehanna	South 4th	City line
Tilghman	Front	30th
Union Boulevard	Irving	Club Avenue
Walnut	South 4th	South 12th

§ 615-36. Prohibited parking. [Amended 1-3-1973 by Ord. No. 11984; 10-6-1994 by Ord. No. 13283]

In the event any street is scheduled by the Mayor, or the Mayor's designated representative, for snow removal, it shall be unlawful for any person to park a vehicle at or failure to remove a vehicle from any place along such street:

- A. Four hours following such posting on all established four-hour-or-less parking meter zones on streets;

- B. Four hours following such posting on all established limited parking zones on streets; and
- C. Six hours following such posting on all other streets.

§ 615-37. Removal of vehicles. [Amended 1-7-1970 by Ord. No. 11784; 10-6-1994 by Ord. No. 13283; 1-7-1999 by Ord. No. 13727]

Any vehicle parked in violation of the provisions of this article may be removed by any member of the Police Bureau, their designee, or a designated Allentown Parking Authority personnel. Any vehicle removed may be towed to and placed at any area designated by the Mayor or his duly designated representative for impounding of vehicles. All costs for removal, towing, storage or parking of any vehicle removed under the provisions of this section shall be paid by the owner of the vehicle and the vehicle shall remain impounded until all costs are paid.

§ 615-38. Snow removal. [Amended 1-7-1970 by Ord. No. 11784; 10-6-1994 by Ord. No. 13283]

- A. No person shall remove snow or ice from private property and put, place, deposit or cause to be put, placed or deposited snow or ice so removed upon the right-of-way of any street.
- B. No person shall remove or cause to be removed snow or ice from any sidewalk or footway and put, place, deposit or cause to be put, placed or deposited snow or ice so removed upon that portion of the street normally used for the travel of vehicles.
- C. This section shall not be in force and effect in areas where curbside parking is prohibited or there is no available private property upon which to put, place or deposit snow or ice so removed.

§ 615-39. Violations and penalties for snow removal provisions. [Amended 6-6-1985 by Ord. No. 12658; 8-5-1987 by Ord. No. 12784]

- A. Any police officer or other duly authorized Parking Authority employee shall place on motor vehicles/conveyances parked in violation of the provisions of § 615-34, Declaration of snow emergency, and § 615-36, Prohibited parking, a notice of said violation. **[Amended 12-1-1993 by Ord. No. 13227; 10-6-1994 by Ord. No. 13283]**
 - (1) Each such owner or operator may, within 10 days of the time when such notice was attached to his motor vehicle/conveyance, pay as a penalty and in full satisfaction of each violation the sum of \$35. **[Amended 4-9-2001 by Ord. No. 13901]**
 - (2) Each such owner or operator may, from the 11th to the 20th day of the time when such notice was attached to his motor vehicle/conveyance, pay as a penalty and in full consideration of each violation the sum of \$50.
 - (3) Failure of the owner or operator to make payment after 20 days shall make the owner or operator subject to a penalty not to exceed \$100. **[Amended 4-9-2001 by Ord. No. 13901; 5-3-2023 by Ord. No. 15898]**
- B. Whoever violates § 615-38A, Snow removal, shall, upon conviction thereof, pay a fine or penalty of not less than \$25 nor more than \$300 and costs. **[Amended 10-6-1994 by Ord.**

No. 13283; 5-3-2023 by Ord. No. 15898]

- C. Whoever violates § 615-38B, Snow removal, shall, upon conviction thereof, pay a fine or penalty of \$100 and costs.¹ **[Amended 10-6-1994 by Ord. No. 13283; 5-3-2023 by Ord. No. 15898]**

1. Editor's Note: Original Art. 528, Prohibiting Use of Mobile Telephones by Persons Operating Vehicles, as added 3-9-2010 by Ord. No. 14782, which immediately followed this section, was repealed at time of adoption of Code (see Ch. 1, General Provisions, Art. I).

OVERTIME & CALL OUT PROCEDURE FOR EMERGENCIES

Saturday, Sunday, and Holiday call out will be based on Bureau Seniority with the exception of the months when the three shift work schedule is in effect. During that time the following call out schedule will be followed. This is to assure proper coverage for all work shifts.

3:00 AM to 11:00 AM --- Call DAYSHIFT

11:00 AM to 7:00 PM --- Call MIDDLE SHIFT

7:00 PM to 3:00 AM --- Call NIGHT SHIFT

All personnel called during an emergency situation are required to report to work as requested.

Regular work day overtime is based on the following:

3:30 PM to 7:00 PM --- Extend DAY SHIFT

7:00 PM to 11:00 PM --- Call NIGHT SHIFT

11:00 PM to 3:00 AM --- Extend MIDDLE SHIFT

3:00 AM to 7:00 AM --- Call DAY SHIFT

Middle and night shift are combined if a two shift operation is necessary.

Snow Removal in Alleys

Snow removal in alleys, when an emergency has been declared, has become a major concern for the City.

Due to the development of many residential living units in these areas it is imperative that we approach removal efforts in an aggressive, and progressive, manner in order to address these concerns. To achieve this, we have divided the City into two zones, which would establish 5 work areas; two (2) in Zone A – East of American Parkway N.E, and three (3) in Zone B – West of American Parkway N.E

In approaching this effort, the individual assigned to a work crew (or group of work crews) is directed to follow the order of removal by street, and direction, as outlined below, unless otherwise directed:

Zone A – Work Area #1

USE WASTEWATER DUMP SITE

- Railroad Street - Turner to Furnace
- Sycamore Street - Ridge Ave to Front
- Brick Street - Liberty - Furnace
- Limestone Street - Chew to Liberty
- Bellevue Street - Chew to Liberty
- Balance of Alleys in the Wards as necessary

Zone A – Work Area #2

USE WASTEWATER DUMP SITE

(Move to East Allentown)

USE KECK PARK DUMP SITE

- Chestnut Street - Railroad to Third
- Bryan Street - Ridge to Front
- Oak Street - Railroad to Second
- Pine Street - Second to Bellevue
- Maple Street - Bradford to Carlisle
- Hickory St - Bradford to Carlisle
- Brook Street - Walnut to Union

Zone B – Work Area #1

(North/South Alleys)

USE JORDAN PARK DUMP SITE

- Chestnut Street - Railroad to Third
- Penn Street - Linden to Tilghman

The orders of streets shown for snow removal were selected primarily on population.

If field conditions should warrant modification of the plan to be more functional, the person shall make the modification, record the change and inform their relief person at shift change. The modification will be discussed at a post-storm meeting that follows the event

City of Allentown, PA

Snow Operations: Deicing & Abrasives Stormwater Pollution Prevention Standard Operating Procedure

Snow Operations	
Purpose of SOP	To document the Best Management Practices adopted by the City of Allentown for the storage, management, and application of materials during operations to remove snow, and to treat public streets, parking lots and City owned properties while ensuring public safety.
MS4 Permit Reference	Part A 5. (c)
Approver	Streets Superintendent, Bureau of Streets
Date/Revision #	11/12/2024 Rev#1

1. Scope

This SOP describes Best Management Practices (BMPs) adopted by the City for road salt (chloride-based deicers), abrasives and other solid and liquid chemicals that may be used in combination with mechanical removal methods (such as plowing) to minimize accidents during the winter months. Activities described in the SOP are performed in coordination with the Snow Emergency Plan in Reference 11.4.

2. Introduction

Snow operations can become sources of pollution as a result of storage practices and overapplication of deicing materials if proper measures are not implemented.

3. Definitions

Abrasives/antiskid materials: Materials which serve to provide a temporary friction layer on the road surface.

Anti-icing: Proactive method of preventing snow and ice from bonding to pavement.

De-icing: Application of a deicing material to the roadway after a snowfall event has occurred and the snow has bonded to the roadway.

Pretreating: Mixing a non-caking liquid into a stockpile of salt before it is applied.

Prewetting: The process of coating a solid deicer with a liquid before it is spread on a roadway.

4. **Responsibilities**

- *Bureau of Streets* is responsible for snow removal and deicing operations in the City's road right-of-way and City parking lots as assigned in the Snow Emergency Plan.
- *Parks and Recreation Department* performs snow removal and deicing operations at Parks' facilities and as assigned in the Snow Emergency Plan.
- *Bureau of Recycling & Solid Waste* performs snow removal and deicing operations at its facilities and as assigned in the Snow Emergency Plan.
- *Building Maintenance and other City staff* may engage in minor treatment of sidewalks and building entrances using bagged or boxed deicing materials and as assigned in the Snow Emergency Plan.

5. **Best Management Practices Incorporated into Daily Procedures**

5.1. **Salt, Deicer and Abrasives Storage**

Improper storage of winter maintenance materials can impact stormwater runoff during all seasons when inventories are maintained.

- Cover for salt, other deicers and anti-icers and mixtures thereof. Salt and other chemical deicers are stored in a covered, permanent structure or container at all times, unless actively loading. Containment structures should be permanent in their construction and made of materials that are not subject to salt corrosion.
- Temporary storage of salt and other chemical deicers outside designated permanent structures is not recommended. Temporary storage piles must be covered with impermeable, adequately secured tarpaulin at all times when not actively used.
- Impervious Bottom. Salt and other chemical deicers will only be stored on an impervious surface such as a concrete slab or an asphalt. The use of a tarp or other material as an impervious bottom is not adequate, unless specifically designed and certified to meet regulatory requirements as described in reference 11.1.
- Liquid chemicals need to be stored in labeled tanks. Proper secondary containment for tanks and associated auxiliary equipment (pumps, valves, dispensers) should be provided.
- Management of Run-on and Run-off. Salt, antiskid, and other deicer materials and mixes must be stored away from storm drain inlets and other conveyance structures. Storage structures must provide adequate barriers to prevent run-on into the storage pile and to minimize erosion. Run-off from salt and other chemical deicer piles should be eliminated, contained, recycled or disposed into the sanitary sewer or any other approved method. Diverted and captured run-off containing salt material can be returned to the storage pile or managed as salt brine.
- Antiskid materials that are not mixed with salt or chemical deicers can be stored outside enclosures but methods to reduce runoff contamination and pile erosion should be implemented. Such methods include use of tarps, silt fences, berms and other methods of containment to prevent entrance of contaminated runoff into storm drains.

5.2. Deicer Preparation, Transfer and Loading

- Various solid deicing mixes of salt and antiskid are prepared on site, inside a covered building, utilizing front loader equipment.
- Best management practices during the mixing process include minimization of spilled materials outside covered area and reducing of dropping heights to minimize dusting.
- In house preparation of liquid deicing solutions occurs inside the maintenance garage in dedicated equipment and the resulting solution is pumped into the storage tanks outside.
- Anti-icing solution is purchased and is delivered into the dedicated tank that is provided with secondary containment.
- Loading de-icing materials in dispensing trucks occurs in the area adjacent to storage. Applied good management practices include avoidance of overfilling loader and truck, and minimization of drop heights to prevent spillage. Care should always be taken not to overfill any of the containers utilized.

5.3. Abrasives, Deicer, Anti-icer, Use and Application

- Alternative methods to reduction of deicers and abrasives include snow removal methods such as mechanical means to remove snow, plowing, shoveling, or blowing should be used as much as possible. Snow fences can help reduction of blowing snow.
- Abrasives increase friction thus salt/antiskid mix is used for improved safety during freezing rain when salt alone is washed away quickly.
- Deicing Material. Prior to each winter season, the City will assess prior years maintenance and use of deicing materials, and to the extent practical, will select the materials and mix that has the least impact on water quality while still effectively meeting public safety needs.
- Anti-icing. Liquid anti-icing materials can effectively reduce the amount of deicing material necessary for a storm event. Anti-icing applications should be conducted per manufacturer's recommendations.
- Pre-wetting chemicals accelerate the brine making process, which improves the melting action of the material and contributes to a reduction in their use.
- The City maintains proper inventories of all winter maintenance materials to minimize and eliminate outside storage or overflow from the designated storage buildings and containers.
- Equipment Calibration. All equipment will be calibrated in accordance with the manufacturer's instructions and the specified applications rates for the various material being applied. Calibration will include plowing speed and applicable spreader settings. The manufacturer's instructions are maintained at the Streets Department facility and referenced prior to each winter storm event.
- Application Rate. The City will use the lowest application rate that will effectively treat surfaces to meet safety needs as recommended by various references including annual PennDOT Local Technical Assistance Program (LTAP) training.

- The City maintains winter snow and ice control procedures that outline levels of service, application rates and plowing frequency for various areas including awareness of salt vulnerable locations.
- The City utilizes various weather services to forecast storms and select the most efficient combination of maintenance procedures according to conditions.
- The spreader will be turned off while loading and any time the vehicle is not moving forward.
- Trucks loaded with de-icing material will be parked under cover whenever possible.

5.4. Deicer Cleanup and Spill Control

- Loading areas will be swept frequently to prevent salt or sand build-up and run-off and recycle swept material inside storage facility. At a minimum, loading areas should be inspected and swept following each storm event or other period when handling occurs. Spilled deicing materials will be collected and reused or disposed of properly.
- Street Sweeping. The City conducts routine street sweeping beginning in spring to clean up debris and other materials that collect during winter months, including salt, sand, and other deicers.
- Small Applications. To the extent practical, small amounts of salt, sand, and deicing materials applied to sidewalks or building entrances by City staff will be swept up and recycled/disposed of properly when weather conditions allow.
- Vehicle Washing at Streets and Garage municipal facility. Spreading and other equipment used during deicing operations and materials preparation will be washed at the designated wash station draining to sanitary sewer.
- Do not dump left over road salt or brine after finished with a run, clean out truck using dry methods prior to washing the truck. Recovered solid abrasives/antiskid from street sweepings during spring campaign can be recycled immediately inside the salt/antiskid building, or if free of salt, it can be used as road subbase on City property or roads, filling for potholes and other fill.
- Accidental, large spillage of salt solution from the single wall tanks utilized for storage can be addressed by facility personnel through implementation of methods for containment within facility stormwater structures. The closest stormwater inlets should be blocked promptly with adequate storm drain covers. Use plugs in pipes leading outside the facility. Remove the inlet covers and vacuum out structures. Surfaces can be power washed inside the inlets. Collected salt solution can be recycled/reused after concentration adjustments.

5.5. Snow Storage, Dump Areas

- See Appendix 1: Snow Dump Site Locations with Stormwater Infrastructure. These locations include Jordan Park and Kline's Island Wastewater Treatment Plant.
- Consideration must be given to the disposal of snow removed from roadways. This snow may contain higher concentrations of roadway salts, sediment, other pollutants and litter. The City has designated snow dumping areas in its Snow Emergency Plan.

Considerations for selection of snow dumping areas include:

- Areas where abrasives and other debris will be contained (depressed areas) after snowmelt for later removal.
- Areas away from drainage systems and/or private or public drinking water well supplies (more than 100 feet due to the possible presence of road salt).
- Take preventive measures to avoid impact or blockage of stormwater infrastructure with debris, sediment and ice utilizing appropriate stormwater BMP including filter inlets, silt fences, temporary/permanent construction fences etc.
- Remove all debris and sediment from storm drains, ditches and basins at the end of winter season.

Do not dump accumulated snow:

- Into waterways, wetlands, or on top of storm drains.
- On stream or riverbanks that slope toward the water, where abrasives and debris can get into the watercourse.
- In stormwater management/green infrastructure BMP areas.

6. Communications

Emphasize communication and coordination for municipal departments and operations and with county and state agencies according to the Snow Emergency Plan.

7. Safety

Adopt general safety procedures according to department requirements.

8. Training

- All personnel who perform winter maintenance activities related to road, parking lot, right of way and City properties must be trained per this SOP with a frequency determined by department manager.
- Training material for this SOP and Best Management Practices for snow operations is developed in house or may be provided by a vendor or outside agent such as LTAP.

9. Records

Records are maintained by various City departments involved with winter maintenance activities and include used materials and amounts, inventories, materials Safety Data Sheets (SDS), materials quality certificates, application rates, applications frequencies, inventory of maintenance locations and areas, weather records, equipment calibration records, sweeping records for roads, right of way, parking lots, stormwater inlet cleaning, personnel training, etc. The records are maintained in various formats including paper located in various files, electronic versions saved on the N drive, or Lucity work order system.

10. Documentation

Documents including this SOP, SDS, Snow Emergency Plan and regulations are maintained in various formats and are reviewed at least annually.

12. Appendices

Appendix 1: Snow Dump Site Locations with Stormwater Infrastructure.

13. Modifications and Review Tracking

Rev #	Date of Revision or Review	Summary of Modifications
0	2/17/2021	Document issuance in accordance with the updated SWMPP submitted to PaDEP in 2020.
NA	02/14/2022	Annual Review.
NA	05/11/2023	Annual Review.
1	10/31/2024	Included references to Allentown City Snow Emergency Plan. Added Appendix 1: Snow Dump Site Locations with Stormwater Infrastructure.

SHOVELING SNOW

DRIVEWAYS

1. The City endeavors to clear as much snow and ice from the road as possible to expedite traffic and make travel safer. When City snow plow trucks clear roads, they'll make multiple passes up and down the roads over an extended period of time. While snow is not intentionally pushed into residential driveways, unfortunately it's unavoidable and snow will accumulate.
2. The City recommends that residents wait until the snow plows finish clearing the streets before shoveling driveway entrances.

SIDEWALKS

3. Residents are responsible for clearing snow and ice from sidewalks along their property. It's also recommended to wait until the snow plows finish, because snow cleared from the roads can push into sidewalks.

How to Prevent the "Second Shovel"!

Preventing Snow Shovel Injuries

Dos:

- Dress in layers
- Stay hydrated
- Pre-treat with salt or ice-melt before it starts snowing
- Shovel only fresh powdery snow
- Shovel a few times during and then after a major snowfall
- Push the snow rather than lift it
- Use an ergonomically-designed snow shovel

Don'ts:

- Shovel after eating a heavy meal
- Smoke cigarettes before, during and directly after shoveling
- Rush, instead take frequent, 15-minute breaks
- Lift the heavy snow shovel with your back
- Throw the snow over your shoulder
- Leave a snow blower running while unattended
