

City of Allentown

Capital Improvement Plan

A capital improvement plan (CIP) identifies the needs of the City over a short period of time, generally one to five years. A capital improvement project is typically an infrastructure project such as bridge replacement, street paving, park improvements, or roof replacement. The CIP identifies the individual project, the current and future funding sources and a project schedule. The projects included in this CIP only include those that are high priority and have committed funding. Potential projects based on need, but without secured funding are not currently included in this document.

The Capital Projects Expenditure Summary includes a listing of the newly funded projects for 2022. These projects include either additional funds being contributed to an ongoing capital project or a new capital project. Each of the projects listed can be found on the Capital Improvement Plan spreadsheet.

The specific information includes the department name, project name, start date, scheduled end date as well as the balance of funds remaining to complete the project. In addition, there is the adjusted amount of funding appropriated by ordinance, the total expended on the project since the start date, encumbrances, and the adjusted balance. The sources of the funding, including general obligation bonds, City general funds, State aid, Federal aid, other non-City aid, Lehigh County funding, short term bonds, the water fund, the A.O. funds, and the Trexler Funds are indicated.

The following projects represent the ongoing Capital Improvements that are either underway or anticipated for 2022.

**CITY OF ALLENTOWN
2022
CAPITAL PROJECTS EXPENDITURE SUMMARY**
